

**WitchDoctor's Billet Specialties LLC**  
**08-09 Oil Cooler Cover**  
[www.buywitchdoctors.com](http://www.buywitchdoctors.com)

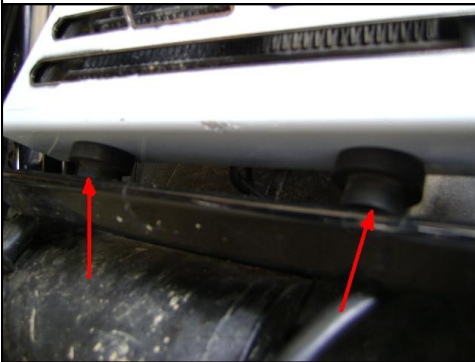

**Attention:**

Do not install with the motor warm. This is an install at your own risk item. If you are not capable of installing it successfully then we suggest you take this item to a professional shop.

Our cooler cover is shipped with a plastic protective cover on it. Remove the cover before installation. If any glue residue remains, it can be easily wiped off with a soft towel.

1) Remove the 10mm bolt that secures the oil cooler to the frame. It will be reused to hold the cover on.

2) Gently lift up on the stock oil cooler. Make sure the rubber vibration mounts stay in the crossbar. Slide the bottom of the cooler cover between the cooler and rubber mount.

3) Slide the top of the cooler cover in place. Re-install the 10 mm bolt through the cooler cover and tighten. Check for clearance and fitment on exhaust. After a few miles of riding check for movement and to make sure bolt is tight.
