Billet Specialties LLC.

WHEEL PULLEY FOR 2005-UP HAMMER/JACKPOT & 2006 -UP VGAS/KINGPIN MODELS

Thank you for purchasing this Witchdoctor's Billet Product. We believe that our products are the very best available and are engineered to provide a lifetime of use. Our rear wheel pulley offers a unique style to your motorcycle that matches your wheels allowing customization and performance. Basic hand tools and a service manual applicable to your model of motorcycle are all that is needed to complete the installation.

Step 1: Following the procedures listed in the appropriate service manual for the year and model of your motorcycle, remove the existing rear wheel pulley. This is also an ideal time to inspect the drive belt, replace if worn beyond the service limits shown in your manual. Also check the wheel bearings and seals for wear. Witchdoctors offers an upgraded high quality bearing kit if needed. (Part # WBK-001)

Step2: Next, follow the procedures listed in the appropriate service manual for the year and model of your motorcycle regarding re-installation of the rear wheel pulley and install your new Witchdoctors pulley. Verify proper belt tension and all fastener torques prior to test riding. Make sure to use Loctite on your pulley bolts. Recheck bolts for tightness after 25 and 50 miles of riding.

Maintenance Tip: to keep your new rear wheel pulley looking its best, we recommend applying a high-quality chrome polish to it every time you detail your motorcycle. We sell and highly recommend Master's Metal Polish for its ease of use and brilliant shine. (MMP-001)

Warranty: Our chrome pulleys carry a 1 year chrome guarantee!
